

# Software Manual Niko Home Control II version 2.0.1 Home

This manual is a step by step guide for common features of the Niko Home Control II programming software. The programming software design and logic have been made even more clear and user friendly. From now on, both the installer and the end user will use the same tool: the installer to program the installation and the end user to make changes. This way, we offer smarter solutions that require less programming.

- A few concepts
- Project menu
- Dashboard menu
- Create menu - Drawing area
