

# Activating Niko Home Control 3th party systems

Opening and closing your roof and sliding windows, controlling your music installation, operating your heat pump, managing your energy consumption, checking and adjusting the air quality in your home: you can easily do it all thanks to Niko Home Control. Via a touchscreen or a Digital black centrally located in your home. Or with your smartphone, wherever you are.

You can activate the link between your Niko Home Control system and the 3<sup>th</sup> party system yourself. In some cases you need a little help from your professional installer.

This chapter will guide you through the activation of the Niko Home Control 3<sup>th</sup> party systems.
